**Key Blanks** 

#### HOW TO USE THE CLASSIC AUTO/TRUCK KEY BLANK REFERENCE

- Two indexes are provided; the MANUFACTURER INDEX and the MODEL INDEX. Both indexes are in alphabetical order. The Manufacturer Index references brands like Toyota, Dodge and BMW. The model index lists models like the Camry (Toyota), Ram (Dodge) and 3 Series (BMW). Both indexes tell the user on what page the reference information will be found.
- The BODY of the Reference explains Manufacturer, Model, Years, Lock Applications and Code Series. Lock application terms include ignition, trunk, glove box
- (GB), valet (operates ignition and door only), and all (single key system, often referred to as a master key). The Ilco/EZ number is the key number. A [P] indicates the key is available with a plastic head.

By learning to use this reference, you can reduce the confusion over which key blank to use in an automobile or truck. Recognize that there will be exceptions to what is considered standard. Before cutting a replacement key, always compare the key blank to be cut with the original key.
